Current Scenario:

What we'll enhance:

This database aims to:

- Provide a platform to present/update an inventory of MPAs in the Philippines;
- Track Progress of MPA management;
- Facilitate information sharing.

At the year of the database's creation (2014) we have an estimated amount of **1800** Unique MPAs

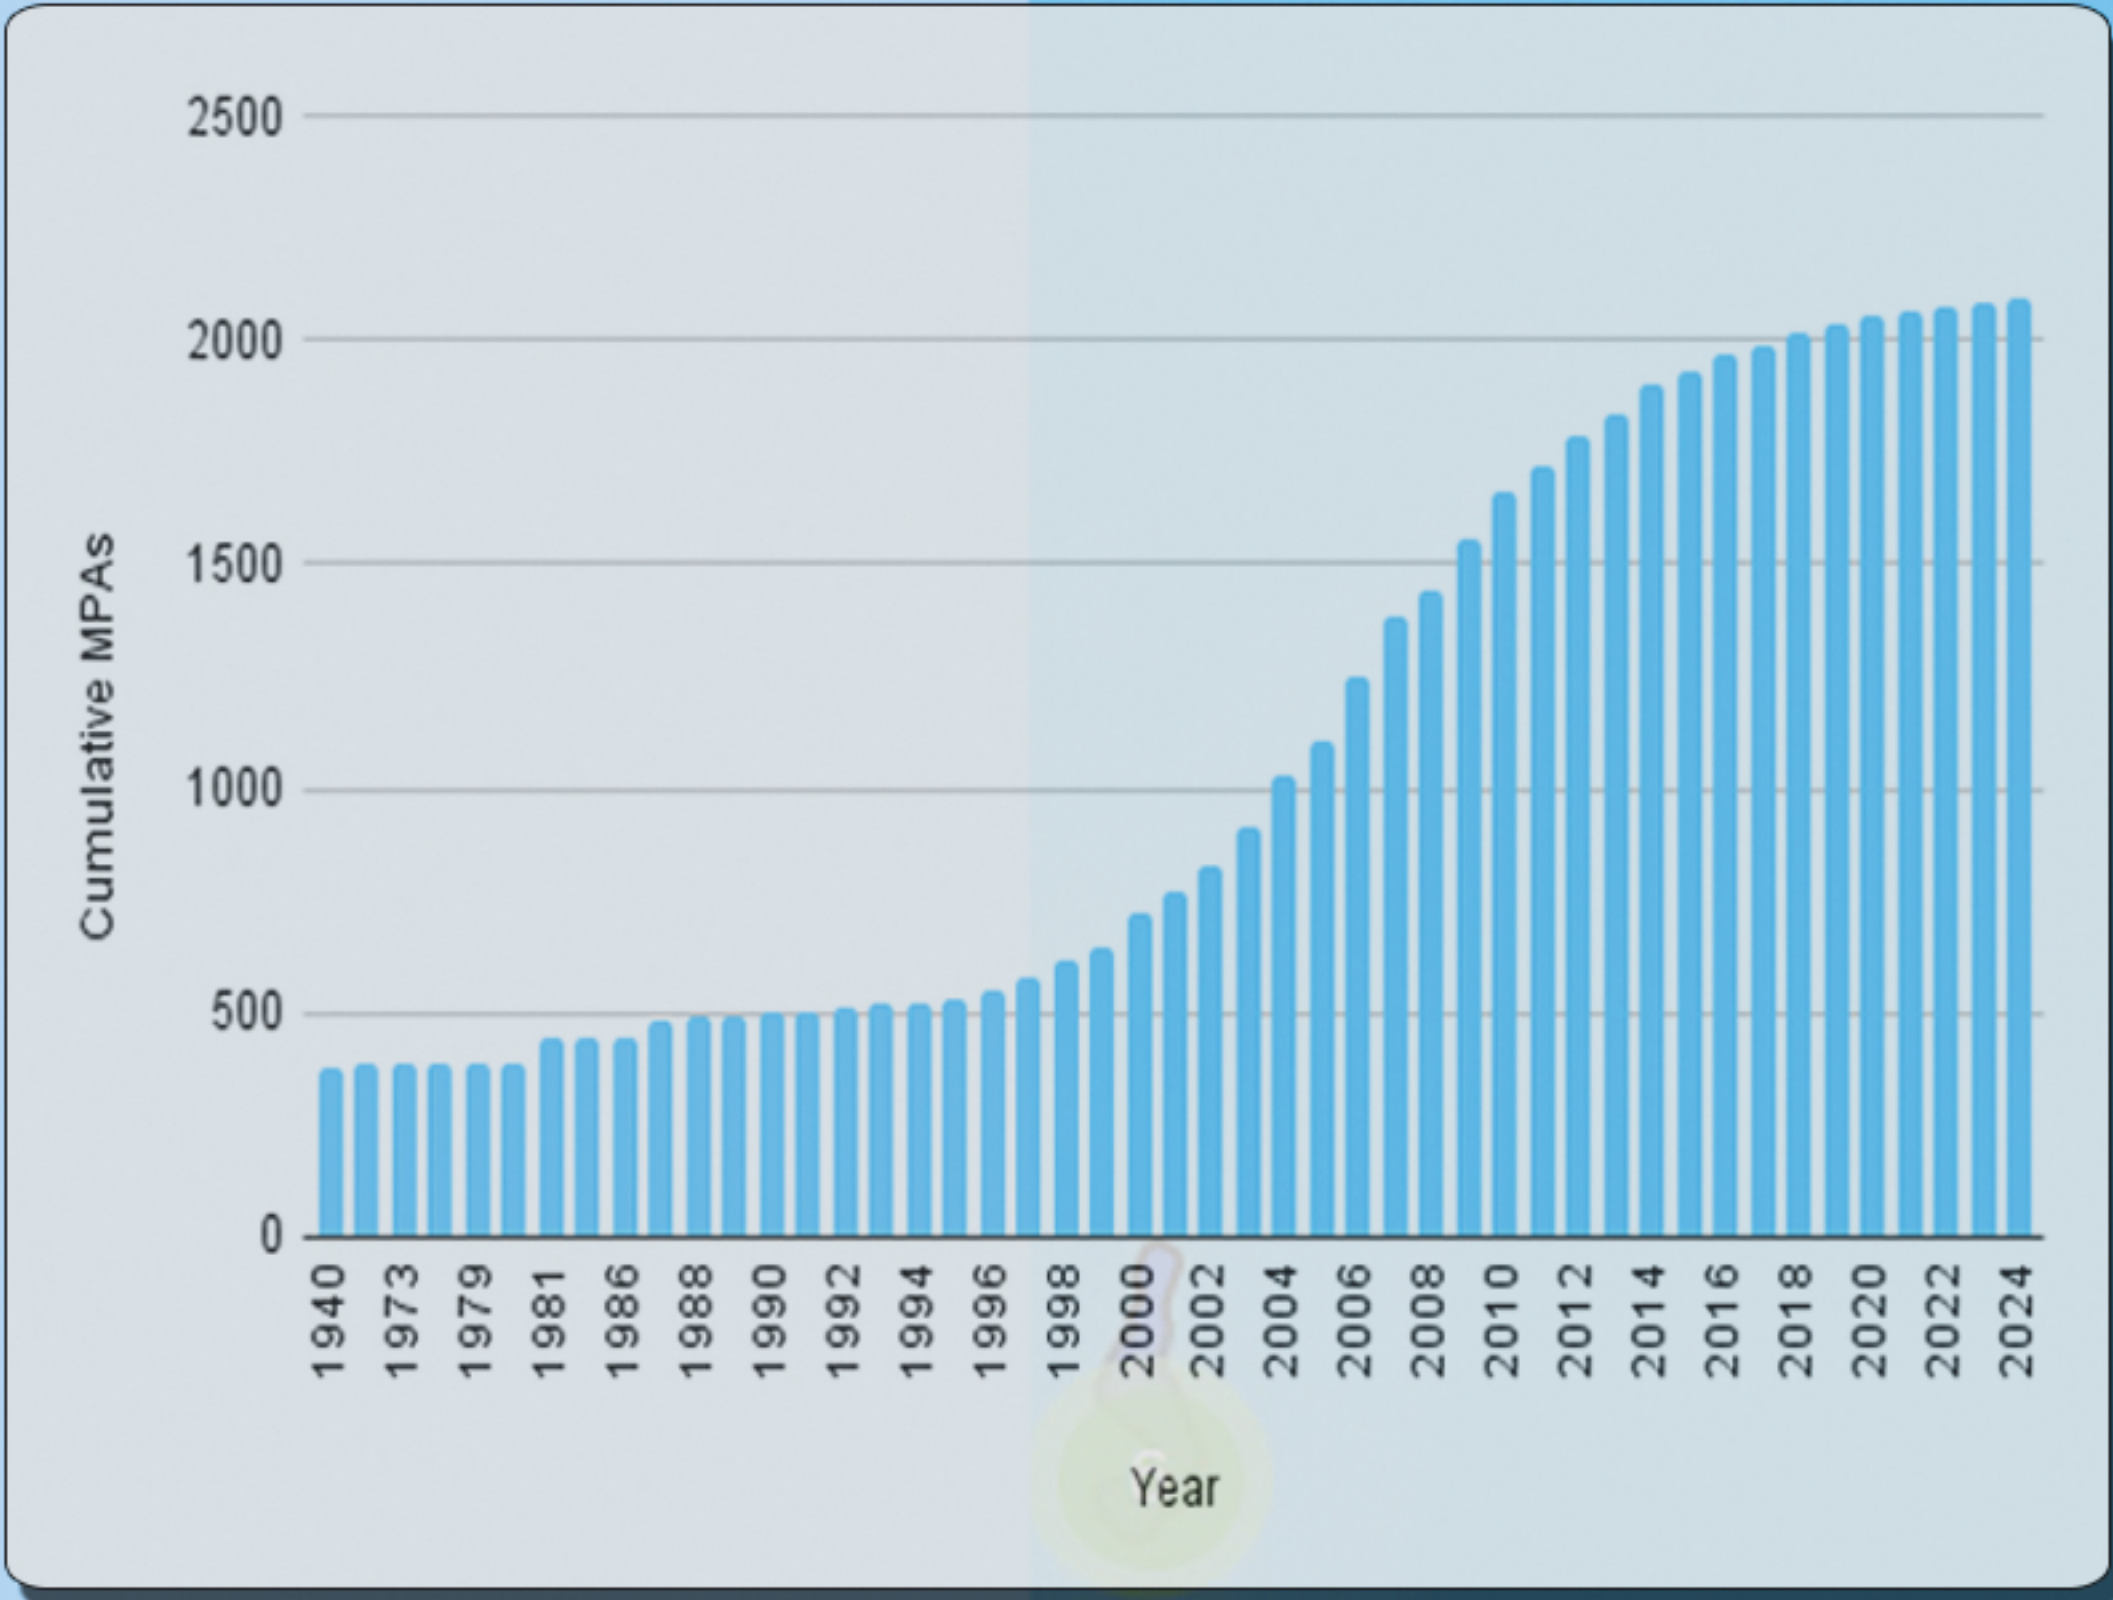

Figure 1. Cumulative MPAs Vs Years

What we've accomplished so far:

- Development of an API for easier data collaboration;
- Updated tool usage for faster data retrieval of upto 1000%;
- Enacted modern security measures alongside to proper data sharing standards.

As of 2025, we have amassed a total of **2220** Unique MPAs

Tools used to update the database

Further Developments to be made:

- The development of Multi Users Access.
- A separation of responsibility for both the users and administrator, to further encourage user-driven data responsibility.
- Further updating the MPAs within the database
- Application of online integration of MEAT Forms with the Para El Mar.

Acknowledgements

We acknowledge the generous support of Rockefeller Philanthropy Advisors through Oceans 5 for the updating of the Philippine MPA Database. We would also like to acknowledge the support and data given by our stakeholders and LGUs of whom this database wouldn't be possible.
